work experience in music

Audio Engineer

Red Feather Studios

Middletown, CT

2019 - ongoing

At Wesleyan, the university where I'm finishing my third year, there is a thriving music culture. One of the staples of this culture is the student-run, free recording studio on campus: Red Feather. Located in the basement of the student organizing center, the studio is open for the entire year and offers anyone the possibility to record for free. Red Feather has a team of producers and engineers, each of which are assigned to sessions with other students wanting to record. Most busy weeks I am in the studio for two nights working whichever session was assigned to me, or with whoever requested I run their session. Working in this unique studio environment forced me to become comfortable with the both extremely rewarding and oft frustrating 'flow of engineering', increased my confidence in songwriting collaboration, and also led to some lasting friendships and creative collaborations.

Production Intern

Massive Music, B.V.

Amsterdam, NL

June - August 2020

During the summer of 2020 I worked as an intern in the production department of Massive Music, one of the world's leading companies in sonic branding, music composition, and music production for advertising, whose headquarters are in my hometown of Amsterdam. At Massive, I assisted in composing four demo tracks for ongoing clients, both local and international, and curated project-specific sample and field recording collections for in-house composers to make use of on similar projects. Other responsibilities included remixing existing music to accommodate client-supplied advertisement edits, as well as supporting the full time producers during recording sessions with voice actors. In addition to being closely involved in production, I also conducted an extensive internal research project where I interviewed producers from different office branches to explore how the approaches to work differ based on which country the branch is located in. At the end of my internship I presented this research to my supervisors.

other work experience

Dishwasher

Restaurant Stork

Amsterdam, NL

June - July 2020

Deli Clerk and Cook

Neon Deli

Middletown, CT

September 2020 - February 2021
